

USE CASE: LCNC Solution for Complete Digitization of Metal Finisher Company

The client is a leading company in the field of metal finishing for the last three decades, serving the finest finishes on architectural aluminum. They have tie-ups with the world's largest paint companies and best pretreatment chemical producers. Over the years, decision-makers struggled to access up-to-date information on inventory levels, production schedules, equipment health, and progress on customer orders, which resulted in shipment errors, stockouts, and less satisfying customer experience, negatively impacting the company's reputation and financial health. As the company grew, it felt the need for digitization to expand into new markets and gain satisfied customers both in the country and abroad.

MAJOR ACCOMPLISHMENTS:

- 3x increase in the volume of work orders handled
- 90% faster at generating Purchase Orders
- 100% end-to-end tracking of party materials

MAJOR MODULES DEVELOPED:__

- Delivery Challan Processing
